Dangers of Butchering At Home are Outlined
Home butchering is profitable on a small scale, but it is dangerous. Equipment, too, should be used with care. All knives should be kept in a suitable place when not in use. Hoisting equipment should be checked. A Lumber should be used to force meat into the grinder.

Quonset-Type Huts Meet Storage Needs
'Little Business' Answers Challenge in Grain Belt

Called upon by the department of agriculture to perform a modern miracle, "little business" in 10 midwestern states is tackling one of the biggest jobs of its kind ever undertaken anywhere in peacetime.

Its Herculean assignment is the site preparation and erection of 2,000 steel buildings—each 22x36 feet or larger—at 700 widely separated locations.

The task arose with the grain belt's acute need for space in which to store the record-breaking carry-over of 1948's corn crop. In line with

the trend toward economical "horizontal" grain storage, the department is erecting Quonset buildings for a large part of the necessary new facilities. These arched steel units are mushrooming up beside highways and railroads near farm communities and labor, rather than the work of transient crews employed by a few big and distant contracting firms.

Within two to three months more than 1,000 concrete foundations had been laid, and erection of steel units was under way in every state. The concrete work alone was roughly equivalent to laying 25 miles of highway in a time that an average road-making crew would require to put down one.

Park Lovers Use Survey By College to Lead Swine
LINCOLN, NEB. — Results of North Carolina state college tests to prove their contention that the swine is the cleanest, smartest, most respectable animal on the farm, are being quoted hereabouts by pork lovers.

Compared to the chimpanzee, brightest of the ape family, the pig is a white at the hip, according to his supporters. He learned to match does in hunting, it was claimed, and only frustrated vanity and common sense drove him to the hog wallow.

Pigs have no sweat glands, it was explained, and the only way for them to cool off is to plunge into the wallow. No other means of cleanliness is provided.

Snide references to a "hoggish appetite," or to the animal's habit of rooting in the soil drew instant defense from the pigs' friends. Can the hog help it if nature endows him with one of the fastest growing bodies in the animal world? And it takes food to grow, they say.

As for rooting, the experts describe it as a good, clean habit, and an economical way of getting essential minerals.

If a pig wants a pet, try a pig, according to these enthusiasts. They argue a pig makes a devoted pet, can be housebroken easily, and has one of the best constitutions for testing baby foods.
